

# Axe PAL-8

Carbon-steel axes featuring a solid HI-VIZ pultruded fiberglass handle with a non-slip grip. Available in flat head and pick head.

## KEY FEATURES

These tools are made of American drop-forged-steel and have high-density and high-visibility handles with increased durability. The company's axes have a solid Hi-Viz pultruded fiberglass handle with a non-slip grip and are used for forcible entry / overhaul.

These ANSI-compliant fire-rescue tools are made of high-carbon, heat-treated steel and are available in 36-inch length variants.
