

Leatherhead Pick Head Axe

Leatherhead Pick Head Axe 8 lb combines cutting capability with penetrating power, making it suitable for demanding structural firefighting tasks.

KEY FEATURES

- **Drop-forged high-carbon steel axe head**
- **Penetrating pick** for breaching and pulling operations
- **Hi-Viz Lime fiberglass handle** for improved visibility
- Integrated **flash reflector and non-slip rubber grip**
- Head **bonded using strong two-part epoxy** for long-term durability
- Designed for structural penetration during ventilation and overhaul
- Manufactured **in the USA**

TECHNICAL DATA

Specification	Value
Model	PAL-8
Head Weight	8 lb
Length	36"
Head Material	Drop-forged high-carbon steel
Handle	Hi-Viz Lime Lime fiberglass
Handle Grip	Rubber grip + flash reflector
Country of Origin	USA

RECOMMENDED PAIRING

Pick Head Axe **PAL-8** is typically used as a **stand-alone ventilation and overhaul tool** rather than part of an Irons configuration. However, it may complement forcible entry operations together with Halligan tools when **penetration and pulling capability are required**.

PRIMARY APPLICATIONS

Ventilation • Roof work • Structural penetration • Overhaul

PRODUCT-MARKET INSIGHT

The pick head configuration enables deeper penetration into building materials, making it particularly effective during roof ventilation and structural access operations.
