

Leatherhead Halligan Bar 30"

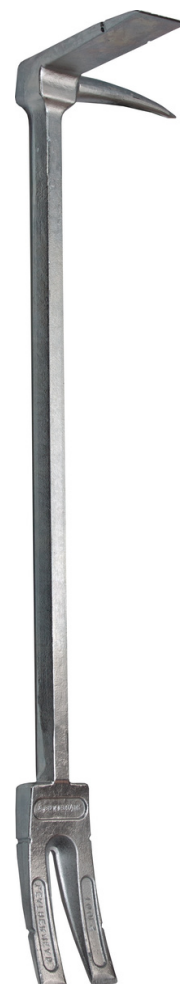

Leatherhead Halligan Bar 30" is a professional forcible entry tool engineered for firefighters and rescue teams. Drop-forged from high-carbon steel and delivered "tuned" out of the box, it offers precise geometry and exceptional durability for demanding entry operations.

KEY FEATURES

- One-piece **drop-forged high-carbon steel construction**
- **Tuned Halligan geometry** for efficient gap-set-force operations
- **Thin tapered forks** for easier door-frame insertion
- **1" fork spread** suitable for through-the-lock techniques
- **Reference lines on forks and adze** for accurate tool placement
- **Smooth adze striking surface** for controlled hammer blows
- **Squared shoulders** to maximise prying leverage
- **Zinc-coated finish** for corrosion protection and easier cleaning
- Manufactured in the **USA**

TECHNICAL DATA

Specification	Value
Model	LB-30
Length	30"
Construction	Drop-forged high-carbon steel
Finish	Zinc coated
Geometry	Tuned Halligan design
Country of Origin	USA

RECOMMENDED PAIRING

Interior Entry Kit: Halligan **LB-30** + Hallway Sledge **SLL-8-24HM**

This compact configuration is designed for **interior forcible entry in confined spaces**, such as apartments, narrow corridors and stairwells, where manoeuvrability and controlled striking are essential.

PRIMARY APPLICATIONS

Forcible entry • Door forcing • Lock removal • Structural prying • Overhaul

PRODUCT-MARKET INSIGHT

The 30" configuration is particularly suited for interior operations where manoeuvrability is essential, allowing firefighters to operate effectively in confined residential environments.
