

Magnetic Drain Cover

Magnaseal magnetic drain cover is a unique patented magnetic urethane sheet that is flexible, lightweight, ultra-thin, highly chemical resistant, space-saving and re-usable solution designed to protect drains from leaks of hazardous materials.

KEY FEATURES

Protection of the responder & environment

Magnaseal products minimise soil and water contamination affecting human, animal, and marine life.

Cost reduction

Magnaseal products are a fraction of the cost compared to the cost of a spill i.e. cost of clean-up, loss of product, downtime, fines, and litigation.

Fast & easy application

Stops hazardous leaks effectively in seconds. Improves safety and response time.

High chemical resistance

Successfully tested against 25 of the most commonly transported and used chemicals at their highest concentration for double the length of a typical test.

High quality strong rare earth magnets

The cover will not float off a drain with a large rush of water. Proven to stop water flowing up and down the drain. No noticeable loss of strength of magnets for many decades.

High quality, flexible & ultra-thin material

Ensures complete drain coverage without air gaps and without the need to apply weight to hold it down. Does not deteriorate over time. Can be stored rolled up and will easily return to flat. High thermal resistance.

Patented design

Patented way to encompass rare earth magnets with urethane. This protects the magnets from direct heat, cracking, rusting, sparking etc.

TECHNICAL DATA

4 available sizes:

CODE	SIZE	WEIGHT
DC010008M	20,32cm x 20,32cm x 0,32cm (8"x8"x1/8")	0,45 kg
DC010012M	30,48cm x 30,48cm x 0,32cm (12"x12"x1/8")	1,36 kg
DC010024M	60,96cm x 60,96cm x 0,32cm (24"x24"x1/8")	4,54 kg
DC010036M	91,44cm x 91,44cm x 0,32cm (36"x36"x1/8")	6,80 kg
