

The FMRS Tool Station is a durable, foldable workspace designed to organise, protect and centralise rescue equipment during operational deployment. Serving as a clean and controlled working surface, it prevents contamination and damage to tools, improving efficiency and safety in demanding rescue environments.

Manufactured from high-resistance Complan fabric (670 g/m²), the mat is engineered to withstand intensive field use. Its non-absorbent, water-repellent and dirt-resistant properties ensure that tools remain clean and protected even in harsh conditions. The large working surface accommodates full rescue tool sets and accessories, supporting structured and efficient scene management.

The foldable design allows for compact storage and rapid deployment, while the included transport bag ensures readiness for immediate use in emergency situations.

KEY FEATURES

- **Durable Complan 670 g/m² construction** – resistant to wear, moisture and contamination
- **Large working surface (2480 × 1980 mm)** – accommodates complete rescue tool kits
- **Foldable design** – enables compact storage and easy transport
- **Non-absorbent and washable surface** – maintains cleanliness and reduces contamination risk
- **Centralised tool organisation** – improves efficiency during rescue operations
- **Transport bag included** – ensures protection and rapid deployment

PRIMARY APPLICATIONS

Vehicle extrication • Technical rescue operations • Fire and rescue services • Equipment staging and organisation • Emergency response operations

PRODUCT-MARKET INSIGHT

The Tool Station enhances operational discipline and efficiency by providing a dedicated, protected workspace for rescue tools. Its durable construction and large surface area make it an essential support element for professional rescue teams seeking to maintain equipment readiness, reduce contamination and improve workflow in high-pressure environments.

TECHNICAL DATA

Specification	Value
Product Type	Foldable rescue tool station mat
SKU of Tool Station	FMRS-TLS01
SKU of Transport Bag	FMRS-TLS02
Dimensions	2480 × 1980 mm
Main Material	Complan technical fabric
Material Density	670 g/m ²
Surface Properties	Non-absorbent • Water-repellent • Dirt-resistant • Washable
Construction	Foldable mat design
Set Components	Tool station mat (1 pc) • Transport bag (1 pc)
Reusability	Designed for repeated operational use
Country of Manufacture	Poland

AVAILABLE SETS

SKU: FMRS-TLS01	
Tool station 2480 × 1980 mm	1 pc
SKU: FMRS-TLS02	
Transport bag	1 pc
