

**INNOVATIVE PRODUCTS
AND SOLUTIONS FOR FIRE,
RESCUE AND HAZ-MAT
OPERATIONS**

FIRE-MAX has over 30 years experience in firefighting and law enforcement industry. We are appointed international Master Distributor for various world recognised manufacturers such as Seek Thermal, Magnaseal, Leatherhead Tools etc. FIRE-MAX has its own product lines too, branded FIRE-MAX Rescue Systems (FMRS). Our philosophy is to provide ready to use, easily available in one place complete packages for the main areas of firefighting: Road Rescue, Fire Fighting and Haz-Mat Operations. This equipment is designed by engineers who are active professional firefighters at the same time and test the tools in real-life situations to ensure their top quality, durability and high performance.

We are looking for partners and distributors

HAZ-MAT OPERATIONS

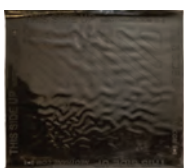

Magnetic Leak Patch

Unique patented magnetic urethane sheet that is the quickest, safest, most effective and efficient way to stop or prevent leaks of hazardous materials. Can be applied anywhere from a derailed rail car, to a pipeline, a corroded tank, or even a punctured barrel. Highly resistant to all types of popular chemicals with option for further reinforcement using dedicated teflon sheets. Very cost effective.

Magnetic Drain Cover

Unique patented magnetic urethane sheet that is flexible, lightweight, ultra-thin, highly chemical resistant, space-saving and re-usable solution designed to protect drains from leaks of hazardous materials. Strong magnets prevent the cover from floating off a drain with a large rush of water. Proven to stop water flowing up and down the drain. Very cost effective.

Non-Magnetic Drain Cover

Magnaseal sewer cover is a unique, patented, non-magnetic urethane sheet that is flexible, lightweight, ultra-thin, highly chemical resistant, space-saving and re-usable solution designed to protect sewers from leaks of hazardous materials.

Sorbi Sorbent

Sorbent designed to safely remove toxic and harmful liquids like oils, fuels, other petroleum derivatives, fats, lubricants, coolants. The sorbent also absorbs chemicals and water

- Exceptional sorbing properties for quick cleaning-up of spills
- Cost effective
- Fire protection effect due to resistance to very high temperatures
- Lightweight and space saving
- Non-toxic, chemically neutral, resistant to fungi and mold
- Unlimited shelf life with no deterioration over time

Sorbi Sorbent Pillows

Sorbent cushion for storing and transporting of harmful, toxic or dangerous fluids and gases and materials (acids, solvents, oils, paints, explosives, batteries etc.) as a combination of sorbing agent with shock absorber and fire protector

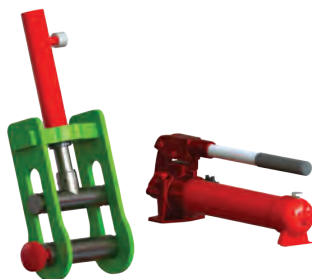

- Fire protector and shock absorber for dangerous goods during transport and storage e.g. Li-Ion batteries
- Protection against spillage of harmful chemicals during transport and storage
- Increases resistance to high temperatures
- Protection against self-ignition
- Does not significantly increase the weight of transported or stored goods thanks to low bulk density and weight
- Non-toxic, chemically neutral, resistant to fungi and mold
- Unlimited shelf life with no deterioration over time

Emergency Hydraulic Leak Stopper

Hydraulic pipe squeezer mainly used to stop the leaks of dangerous liquids. Large squeezing surface. This tool is equipped with valve to control the squeezing pressure

- Quick temporary solution to dangerous leaks
- Stops leaks of dangerous liquids
- Can squeeze pipes of maximum 65 mm diameter
- Large squeezing surface of 75 mm
- Control valve
- Easy and safe operation
- Transport case

ROAD RESCUE

Rescue Struts UltraLight

- Available in 3 versions with max load: 1000, 1500 and 2500 kg
- Lightweight, strong and durable aluminium alloys
- Head designed to ensure excellent adherence even to flat surface
- Slide-Stop system to allow self readjustment if an object moves

Rescue Struts Steel

- Max load: 1500 kg
- Strong and durable
- Head designed to ensure excellent adherence even to flat surface
- Slide-Stop system to allow self readjustment if an object moves
- Exchangeable head to connect 2 struts with bi-pod attachment

Quick Stabilisation Tool

- Innovative solution for quick, easy and reliable stabilisation
- Max load: 1000 kg
- Adjustable height
- Easy readjustment during rescue operation
- Foldable handle to avoid tripping hazard

TSS Blocks & Wedges System

- Timber Stabilisation System, blocks and wedges of various sizes
- Colour coded sizes
- Strong and durable
- Eco-friendly

Ram Supports

- Designed to be used with all types and brands of hydraulic tools
- Perfectly adheres to body work for efficient transfer of an forces
- Non-slipping for safe and stable support in all necessary directions
- Additional holes for belts or chains
- Sturdy and durable made of 10 mm thick carbon steel
- Corrosion resistant
- Suits modern vehicles

Protection Covers

High quality, sturdy and durable, tear- water- and dirt-resistant covers designed to protect firefighters, victims and equipment during rescue operations.

Halligan Bar

Multipurpose tool ideal for pulling, prying, striking, punching or twisting during overhaul or for forcible entry applications. It meets ANSI specification for hardness and comes in 30-, 36- and 42-inch length variants. This Halligan bar is forged from one piece of high-carbon, heat treated steel for extended durability and comes with zinc plating for corrosion resistance.

Axes (Flat & Pick head)

Made of American drop-forged, high-carbon, heat-treated steel with high-density, high-visibility, non-slip pultruded fiberglass handle. Available in flat head or pick head and 36-inch length. ANSI-compliant.

Sledgehammer

ANSI-compliant double-face sledgehammer with a fibreglass handle, ideal for forging and riveting applications, forcible entry and overhaul. Made of American drop-forged, high-carbon, heat-treated steel with high-density, high-visibility, non-slip pultruded fiberglass handle. Available in 24- and 36-inch length variants.

FIRE EQUIPMENT

Reveal FirePRO X

- Personal TIC for Every Riding Position
- Faster primary Search
- Self rescue
- Reducing rekindles
- High technical specification (320x240 sensor, 15Hz refresh etc.)
- Small, lightweight and affordable

Multi-Charge Dock

- For use with Reveal FirePRO X thermal camera
- Charge 1-4 FirePRO X TICs simultaneously
- Desktop or wall mountable with included brackets
- LED indicator to show the unit is properly docked
- Elastic retention strap for a secure hold
- AC power supply with US, EU, and UK plugs

Mist-er-Killer Fire Lance

- Fire extinguishing lance designed to fight fires in enclosed spaces, difficult access areas or high risk fires
- Versatile tool, exchangeable heads for attack, defence or for peat & forest, straw & dust fires
- No need to pre-drill holes
- Pierce easily through all type of popular materials incl. brick walls, concrete, wood, metal
- Integrated hammer for piercing through thick walls
- Made with high quality treated steel to ensure long life without loss of quality or efficiency
- Produce water mist to fight fires with greater efficiency

Niagara Floating Pumps

- Ideal for emergency situations where pumping is necessary e.g. transferring water from one tank to another, drying flooded basements etc.
- 3 models available: 2, 2+, 3
- Can pump water with considerable grade of pollution
- Four stroke engines
- Compact size and light weight for easy carry in a difficult terrain

Hybrid-Mister

- Water mist cooling device for hybrid cars chassis
- Quick and easy to use
- Cost effective
- Compact size
- Light weight

SOSnake Hoses

- High quality materials: polyester and thermoplastic elastomer
- Light and flexible even at low temperatures
- Resistant to weather conditions

Hand Roller for Fire Hoses

- Useful tool for hand rolling fire hoses
- Foldable handle
- Compact size
- Light weight
