

Leatherhead Halligan Bar 36"

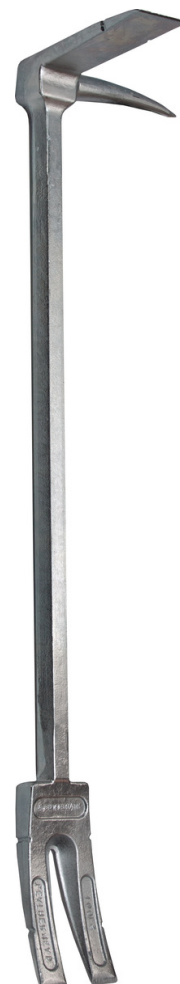

Leatherhead Halligan Bar 36" represents the most widely used configuration of this iconic forcible entry tool. The drop-forged high-carbon steel construction ensures maximum strength while the tuned geometry provides optimal leverage and control during entry operations.

KEY FEATURES

- One-piece **drop-forged high-carbon steel construction**
- **Tuned Halligan geometry** optimised for gap-set-force technique
- **Thin tapered forks** for rapid door-frame entry
- **1" fork spread** supporting through-the-lock operations
- **Reference markings** for precise positioning
- **Smooth adze striking surface** for efficient hammer blows
- **Squared shoulders** to maximise prying force
- **Zinc-coated corrosion-resistant finish**
- Manufactured in the **USA**

TECHNICAL DATA

Specification	Value
Model	LB-36
Length	36"
Construction	Drop-forged high-carbon steel
Finish	Zinc coated
Geometry	Tuned Halligan design
Country of Origin	USA

RECOMMENDED PAIRING

Standard Irons

Halligan **LB-36**

- Flat Head Axe **FAL-8**

The traditional **Irons configuration** widely used by fire departments for forcible entry operations.

PRIMARY APPLICATIONS

Forcible entry • Structural prying • Door and lock forcing • Overhaul

PRODUCT-MARKET INSIGHT

The 36" Halligan is considered the global standard for forcible entry operations, offering the optimal balance between leverage, control and operational mobility.
