

Leatherhead Halligan Bar 42"

Leatherhead Halligan Bar 42" provides extended leverage for heavy forcible entry and structural rescue tasks. The drop-forged high-carbon steel construction and tuned geometry ensure reliability when maximum prying force is required.

KEY FEATURES

- One-piece **drop-forged high-carbon steel construction**
- **Extended length for increased leverage**
- **Thin tapered forks** for gap insertion
- **1" fork spread** supporting lock removal operations
- **Reference lines** for accurate tool placement
- **Smooth adze striking surface**
- **Zinc-coated finish** for corrosion resistance
- Manufactured in the **USA**

TECHNICAL DATA

Specification	Value
Model	LB-42
Length	42"
Construction	Drop-forged high-carbon steel
Finish	Zinc coated
Country of Origin	USA

RECOMMENDED PAIRING

Heavy Irons

Halligan **LB-42**

- Sledge Hammer **SLL-8-36HM**

The extended Halligan length combined with a heavy striking tool provides **maximum leverage and impact energy for heavy-duty forcible entry operations.**

PRIMARY APPLICATIONS

Heavy forcible entry • Industrial doors • Structural rescue • Overhaul

PRODUCT-MARKET INSIGHT

The extended 42" configuration increases mechanical advantage during prying operations, making it particularly effective when forcing reinforced or industrial-grade doors.
