

Leatherhead Hallway Sledge

Leatherhead Hallway Sledge 8 lb – 24" is designed for controlled striking during forcible entry operations in confined interior environments where full-length tools cannot be swung effectively.

KEY FEATURES

- **Drop-forged high-carbon steel striking head**
- **8 lb head weight** for effective impact energy
- **Compact 24" length for close-quarters operations**
- **Hi-Viz Lime pultruded fiberglass handle** for durability and visibility
- **Reflective striping** for improved tool detection in low-light environments
- **Fiberglass handle that will not splinter like wood or weaken over time**
- **HM configuration compatible with Halligan marrying system**
- **Manufactured in the USA**

Specification	Value
Model	SLL-8-24HM
Head Weight	8 lb
Length	24"
Head Material	Drop-forged high-carbon steel
Handle	Hi-Viz Lime pultruded fiberglass
Halligan Compatibility	HM (marrying option)
Country of Origin	USA

RECOMMENDED PAIRING

Interior Entry Kit

Halligan Sledge **SLL-8-24HM**

- Halligan **LB-30**

The shorter handle allows controlled striking when operating in **restricted interior environments**.

PRIMARY APPLICATIONS

Forcible entry support • Halligan striking • Interior operations

PRODUCT-MARKET INSIGHT

The compact hallway sledge is widely used in forcible entry teams operating in residential buildings where space restrictions require controlled striking with limited swing radius.
