

Manual Hose Roller is a compact and practical solution designed to simplify the rolling and handling of firefighting hoses after use.

It enables fast and efficient hose management, reducing physical effort while ensuring consistent and tight rolling for storage and transport. Engineered with a foldable handle and stable base construction, the device provides ease of operation in both station and field environments. Its lightweight design allows for convenient transport, while maintaining sufficient durability for regular operational use.

KEY FEATURES

- Lightweight construction for easy handling and transport
- Foldable handle for compact storage and mobility
- Stable base design ensuring smooth and controlled rolling
- Enables fast and efficient hose rolling with reduced physical effort
- Suitable for multiple hose diameters
- Simple and reliable mechanical operation
- Designed for everyday operational use in fire stations

TECHNICAL DATA

Specification	Value
Product Type	Manual hose roller
Suitable Hose Diameters	42 mm • 52 mm • 75 mm
Weight	3.5 kg
Dimensions	450 × 270 × 430 mm
Operation	Manual
Handle Type	Foldable

PRIMARY APPLICATIONS

Fire station hose management • Post-incident hose handling • Hose maintenance and storage • Training environments

PRODUCT-MARKET INSIGHT

Efficient hose handling remains a fundamental operational need for fire services. The Hand Roller for Fire Hoses provides a simple, cost-effective solution that improves workflow efficiency, reduces manual strain, and supports proper hose maintenance practices.
