

FM Rescue Technical Extrication Gloves

Protection, precision and control for demanding rescue operations.

FM Rescue technical extrication gloves are designed for professional firefighters and rescue teams who require reliable hand protection without compromising dexterity. Engineered for technical rescue and extrication tasks, the gloves provide mechanical protection against abrasion, cuts and impacts while maintaining flexibility and comfort for precise handling of rescue tools during intensive rescue operations.

- **Maximum dexterity (Level 5)** → precise handling of rescue tools and equipment
- **Reinforced palm construction** → durability and reliable mechanical protection
- **Impact-absorbing knuckle protection** → improved hand safety during operations
- **Ergonomic lightweight design** → comfort during prolonged rescue work
- **High-visibility materials and secure cuff system** → improved fit and operational safety
- **Available Models:** FM Rescue Technical Extrication Gloves and FM Rescue IRON Technical Extrication Gloves
